EDUCATION

Bachelor's Degree

Software Engineering,
Azad University of
ShahreRay, Iran
2017

PROFESSIONAL OVERVIEW

Senior Frontend Developer with 6 years of experience building scalable web apps. Skilled in **Angular, Vue, and React**, with strengths in architecture, testing, and CI/CD. Collaborative problem-solver committed to clean, maintainable code and great user experiences.

WORK EXPERIENCE

Senior Frontend Developer, Soschyant (fintech)

2022- May 2025

Techs: Vue 3, Vite, Angular, NGRX, Tailwind, Sentry, Testing, PNPM, Tanstack Query.

- Spearheaded Vue.js and Vite integration to deliver high-performance web applications, streamline team workflows, support a platform serving over 500k users.
- Integrated form validation using VeeValidate and modularized components for reusable UI elements.
- Optimized API handling and caching strategies using Tanstack Query and Vue composables.
- Skillfully utilized Tailwind CSS to translate design concepts into responsive and visually appealing interfaces.
- Enhanced deployments using GitLab CI/CD and Docker.
- Upgraded Angular 11→15 with 20% higher performance, 15% fewer bugs, and enhanced security aligned with modern standards.

Frontend Developer, DayaSoft GmbH (Consultancy)

2020- 2022

Techs: React, Redux, NextJS, Azure, AntD, Formik, Yup, Testing

- Integrated a Notification Manager into the centralized API response handler, enabling consistent user feedback across the app and reducing redundant notification logic by 30%.
- Reduced redundant requests by 25% using React Query, improving responsiveness.
- Developed dynamic charts for faster and clearer user data insights.
- Created web applications with Next.js, enabling server-side rendering and achieving 30% faster load times.
- Implemented SASS to create themeable dashboards with variables and mixins, resulting in a 20% increase in design consistency.
- Used React-Intl to provide the mechanism to properly translate file text into other languages and not hard-code labels

Frontend Developer, Sepehr360 (Search engine for agencies)

2018- 2020

Techs: AngularJS, Angular+2, Bootstrap, Angular material

- Modernized the platform by migrating from AngularJS to Angular 6, improving performance and code quality.
- Developed responsive PWA features and transformed UX designs from Zeplin into high-quality CSS.
- Monitored performance and used analytics insights to reduce user-reported issues and enhance UI.
- Collaborated with a cross-functional team delivering solutions to 3000+ B2B clients on time.
